AXIS T90A Illuminators
High-performance illumination for all conditions.

For optimal lighting, AXIS T90A Illuminators allow adjustment of the light angle from 10 to 180 degrees in distances up to 150 meters. The illuminators are designed for both fixed and PTZ network cameras.

AXIS T90A Illuminators is a series of high-performance white and infra-red LED illuminators designed for Axis network cameras. They provide unique flexibility to alter the angle of on site illumination to suit specific security needs, and to match the network camera’s field of view.

Providing exceptional durability, the new surface-mount technology LED’s have a life-cycle of up to 10 years. No light bulbs need to be replaced.

The illuminators are high-efficiency LEDs (light-emitting diodes) with advanced control methods for extremely low energy consumption. Based on solid state LED technology, AXIS T90A illuminators are highly energy efficient allowing for huge savings in long-term operational and maintenance costs compared to traditional light bulbs.

IP66-rated vandal-resistant casing and polycarbonate lens protection for indoor and outdoor use makes these illuminators the ideal choice for security installations requiring high-performance and low-maintenance illumination.
