

2mm Reveal

Ghost

The in-ceiling Ghost Series features a patented design, super flush rimless speaker. Once again we've broken the mold of cutting-edge speaker technology and innovation. TruAudio specializes in unique, yet affordable architectural speakers. We constantly go to great lengths to ensure that our speakers blend into any room's décor while still delivering unforgettable, life-like sound. The Ghost Series pushes this concept to an all new level. A patented designed speaker housing, hides the entire frame once the grill is installed. With this new design, the speaker blends seamlessly into the room's environment and is a true labor saver.

TruAudio speakers are known for amazing sound and ease of installation; now they virtually disappear as well. The finished Ghost Series speakers feature a mere 2mm reveal. The rimless grill attaches easily and covers the lip. Once installed, no part of the speaker shows except for the grill. Since the grill has no rim, it easily disappears and blends into it's environment.
