

	REVISED	DR	APP

Use this TAE-F adapter cable for your DSL / VDSL terminal and connect directly your telephone socket to your compatible router.

Note that your DSL terminal / router must be working without a splitter and you can not use an analog / ISDN-based phone.

Thanks to the copper structure and twisted pair shielding it is working for high speed internet.

The moulded RJ-45 connector and the strain relief on both sides, ensure a secure and stable connection.
