VIPRE Endpoint+Email 360

Secure your technology vulnerabilities and empower your employees with our streamlined business security solution

CYBER ATTACKS ARE ON THE RISE, data breaches are at an all time high and business systems are more exposed than ever before. Whether you are a global enterprise with thousands of employees or an SME with 25, you need to act now to secure your business.

Hacking groups now possess the tools capable of penetrating industries and organisations once thought to be impenetrable. To defend from this next generation of cyber-attacks, IT departments must solve modern security challenges with a modern, multi-layered approach; using protection not only at the perimeter, but also from within the network and workforce.

That's why VIPRE Security has put together **VIPRE Endpoint+Email 360**, a solution to protect an organisation's technology and human vulnerabilities combining cutting edge security with world-class security awareness training.

ENDPOINT+EMAIL 360 SERVICES:

Security Awareness Training
Education to enhance your employees' security posture when faced with evolving cyberthreats, 85% of which result from phishing and business e-mail compromise [1]

Email Cloud
Safeguards businesses against attacks perpetrated through email, the most common threat vector. Defends users against the newest, most sophisticated strains of malware, weaponised attachments, and phishing techniques that evade traditional detection

Web Access Control
Content filtering restricts access to resource-wasting websites and inappropriate media with granular settings for users and groups

Endpoint Security
Best-in-class endpoint protection—powered by machine learning and real-time behavioural analysis—to stop viruses and ransomware in their tracks

Phishing Protection
Guard end-users from bad links by rewriting URLs, implementing ransomware filters, and adding customisable user alerts

Attachment Sandboxing
Evaluate unknown attachments for potentially malicious behaviour in a virtual environment that applies machine-learning models to real-time employee activity

Simplified Support
A singular vendor provides one point of contact for billing, technical support, and administrative assistance for a seamless experience

VIPRE IN NUMBERS

20+
years of malware protection and cybersecurity

1M+
unique malware samples processed daily

20M+
endpoints protected

10M+
inboxes secured

KEY BUSINESS BENEFITS

✔ Build a smarter, safer workforce prepared to recognise online threats and cyber attacks

✔ Slash device and employee down-time due to ransomware, viruses and attacks on servers and   worksta-tions

✔ Reduce business-threatening recess due to malware, phishing, and spam attacks via email

✔ Isolate malicious activity and unap-proved downloads before they can affect your organisation

✔ Enforce acceptable-use policies to reduce inefficiencies, complaints, and legal liabilities

✔ Block the leading cause of ran-somware delivery by automatically scanning email links

✔ Streamline security operations - multiple services through one vendor with one support team and one billing contact

Managing a variety of security solutions from different vendors can become daunting—simplify your security management and provide truly effective, layered protection with **VIPRE Endpoint+Email 360**.

> "ANYONE FAMILIAR WITH THAT TYPE OF VIRUS UNDERSTANDS THE POTENTIAL DAMAGE IT CAN CAUSE TO AN ORGANIZATION. WHEN OUR EMPLOYEE DOUBLE-CLICKED ON THE CRYPTOLOCKER FILE, VIPRE VAPORIZED IT INSTANTLY."
